

SHUBHAM KUMAR

B.Tech Computer Science Engineering (3rd Year)

7870841473 | shubhamkm07@gmail.com | linkedin.com/in/shubham-kumar | github.com/myselfshubham1

EDUCATION

ITM University

B.Tech – Computer Science Engineering

CGPA: 8.3/10.0

2023 – 2027

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Backend / Systems: C++ STL, File Handling, MySQL, REST APIs, Postman

AI / ML: NumPy, Pandas, Scikit-learn, YOLOv8, OpenCV

Web: HTML, CSS, JavaScript

RELEVANT COURSEWORK

Data Structures & Algorithms · Object-Oriented Programming · Database Management Systems · Operating Systems · Computer Networks · Software Engineering · Discrete Mathematics · Machine Learning

EXPERIENCE

Software Development Intern – Blog Post Management System

Intellige IT Studio

Industrial Training

Java, MySQL, REST APIs

- Completed industry-oriented software development training and developed a fully functional **Blog Post Management System** using Java, MySQL, HTML, CSS, REST APIs, and Postman.
- Designed and implemented **REST-based backend APIs** for blog and user management supporting full CRUD operations (create, update, search, delete).
- Implemented **User and Admin roles** with role-based access control for secure content management.
- Enabled tracking of creation and update timestamps for blogs, ensuring data audit capabilities.

PROJECTS

MCP Server – AI-Driven 3D Model Generation | Python, Socket Programming, Blender, Cursor AI

- Designed and implemented a **custom MCP server** using socket-based communication for real-time tool integration.
- Integrated **Blender & Cursor AI** to enable 3D object generation using natural language prompts.
- Built a **scalable, real-time system** capable of connecting multiple tools simultaneously.
- Enabled full **customization and modification** of 3D models based on user input.

Object Detection using YOLOv8 | Python, YOLOv8, OpenCV

- Developed a **real-time object detection system** using the YOLOv8 deep learning framework.
- Trained and evaluated the model on a dataset of **~10,000 images** to improve detection accuracy.
- Implemented **live camera-based detection** with high accuracy for real-world applications.
- Applied data preprocessing and model tuning techniques to optimize performance.

MINI PROJECTS

To-Do Application – Full-stack task management app with CRUD functionality

Chatbot – Interactive conversational bot using rule-based/NLP techniques

Calculator – Multi-function calculator application with scientific operations

Profile Calculator – Profile analytics and scoring tool

Number Guessing Game – Interactive CLI game with randomized logic and difficulty levels

ACHIEVEMENTS & HACKATHONS

- Winner** – Hackathon conducted by ITM University
- Finalist** – “FinShield” Hackathon conducted by Bank of India; presented solution at IIT Hyderabad
- Participant** – Smart India Hackathon (SIH) and actively participated in multiple inter-college hackathons
